

32-0-6 with EPEC

For consistency and results, Turf Mangers turn to ProGreen Plus Professional Turf Fertilizer with EPEC® controlled-release fertilizer.

EPEC coated nitrogen contains the latest in polymer-coated technology that delivers reliable nutrient release with lower potential for nitrogen loss from leaching or volatilization.

35% EPEC, 2-MONTH FEEDING

32-0-6
PCU, 2% Fe

GUARANTEED ANALYSIS

Total Nitrogen (N) 32.0%
32.0% Urea nitrogen*
Soluble Potash (K₂O) 6.0%
Iron (Fe)..... 2.0%

Plant foods derived from: Urea, Polymer Coated Urea, Muriate of Potash and Iron Oxy-Sulfate.

*11.2% slowly available urea nitrogen from polymer coated urea.

FEATURES

- Reduced likelihood of growth flushes and burn
- Release regulated by soil temperature and coating thickness
- Environmentally responsible with lower potential for nutrient leaching, denitrification, runoff, or volatilization

CONSISTENT. RELIABLE. PRECISE

KEY BENEFITS

- Quick greening
- Provides long-lasting feeding
- Potash to enhance turf health and root development
- Contains iron for deep greening
