

Power Supply/Relay Box

BigBoss

BARTLETT

— INSTRUMENT COMPANY —

Power Supply/Relay Box for
24V DC vent motors!

The BigBoss is a 24VDC power supply designed to control **two 10A motors** for roll up/down walls. It is a great companion for 24VDC motors providing **time and labor savings** for many growers. For convenience, the BigBoss has 10A resettable circuit breakers to protect each motor. A 5A circuit breaker **protects** the BigBoss from power surges and shorts. Enhance the BigBoss' capabilities by adding a Bartlett Temperature controller with proportional outputs (RWL11X2 and GHK12X2C) to gain coordination of your heating and cooling needs and take advantage of the **DIF, DAY, & NITE** features the unit offers.
