

**3-Year  
Warranty on  
the ENTIRE  
Fan!**

**Priced  
25% Less  
than the  
Competition!**

J&D recommends that you space JD360 fans 60' from each other and 30' from the wall.

| Part#                             | Size                                   | Ph | Spd | FPM @ | Drive  | Prop  |
|-----------------------------------|--|----|-----|-------|--------|-------|

| JD360                             | 18"                                    | 1  | 1   | 1,790 | Direct | 6-Ply |
| <b>Optional Mounting Brackets</b> |  |    |     |       |        |       |
| HK222                             | Mounting Bracket for 2" OD Round Pipe  |    |     |       |        |       |
| HK223                             | Mounting Bracket for 2" OD Square Pipe |    |     |       |        |       |

OSHA requires this fan to be mounted a minimum of 7' above the floor.

Required obstacle-free zone around each fan.

**Reduce the  
temperature  
gradient from floor  
to ceiling by up to  
55%!**

# JD360

## Destratification Fan

**J&D Manufacturing**  
 6200 US-HWY 12, EAU CLAIRE, WISCONSIN 54701

Family Owned & Operated in Eau Claire, WI

# JD360 Destratifier

## What is Stratified Air?

Stratified air, or thermal stratification is different air in different vertical locations in an enclosed environment. Stratified air occurs when heavy, cool, dense air sinks to ground level, while warm, light, thin air floats and lingers at the top of the building. Not much air mixing is going on when air is stratified.

J&D's JD360 Destratifier fan creates low-air-speed vertical air movement providing a comfortable and uniform environment.

## Benefits of destratifying air with the JD360

### COMFORTABLE & HEALTHY ENVIRONMENT

Uniform temperature throughout & limit moisture condensation

### SAVE MONEY & ENERGY

Move the warm air where you need it & save on your energy bill

**Add HPF for enhanced cooling!**

### Mounting Brackets & Hardware

- Corrosion-resistant stainless-steel

### 3 Hanging Options

### Motor

J&D's Gold Star motor

- IP66-rated
  - Dust tight
  - Wash down from any angle
- CSA recognized
- Totally enclosed, maintenance-free, high efficiency
- Covered by a **3 Year Warranty**

### Diverting cone

- Smooth, for maximum air fluidity
- Molded from corrosion proof UV-resistant poly

### Guards & Frame

- Heavy gauge steel
- Powder-coated for corrosion resistance and easy cleaning

### Poly Bladed Prop

- Precisely contoured blades for efficient air movement
- Corrosion-resistant cast aluminum hub
