

Professional Potting Mix

A ready-to-use lightweight potting soil formulated for use in both indoor and outdoor planting. Perfect for hanging or potted plants, starting seeds in flats, or planting bulbs. This mixture includes a proven blend of sphagnum peat moss, coconut coir, aged pine fines, perlite, calcitic & dolomitic limestone, gypsum, and wetting agent. It promotes aeration, uniform root penetration, aids in moisture retention and protects the soil from drying out and hardening.

Product Highlights:

- Perlite promotes aeration, uniform root penetration, & improves water drainage.
- Coconut coir and sphagnum peat moss aid in moisture retention and protect the soil from drying out and hardening.
- Micronutrients fertilizer charge added as a natural growth enhancer.

The Frey Group, LLC difference

Here at Frey Group, LLC, we are proud of the quality and consistency of our compost-based soils. Ours are made using carefully designed and tested recipes which include the very best ingredients combined with rigorous quality controls. We never use biosolids, municipal or household waste. Close attention to detail with frequent turning, sampling and testing plus a lengthy aging and curing process produces dark, rich compost.
