

Professional Planting Mix

A blend of soil conditioners perfect for planting annuals, perennials, trees, and shrubs. Its formula includes: aged pine bark fines, sphagnum peat moss and select natural compost, to help with soil aeration, strong root growth, moisture retention and soil porosity. When mixed into your existing soil, it revitalizes the soil's structure and texture.

Product Highlights:

- Excellent Soil Conditioner creates a more favorable soil environment to both condition and revitalize deficient native soil.
- Promotes strong root development in new plantings.
- Sphagnum peat moss provides added organic matter that helps with aeration
- Pine bark fines aid in moisture retention and protect the soil from drying out and hardening.

The Frey Group, LLC difference

Here at Frey Group, LLC, we are proud of the quality and consistency of our compost-based soils. Ours are made using carefully designed and tested recipes which include the very best ingredients combined with rigorous quality controls. We never use biosolids, municipal or household waste. Close attention to detail with frequent turning, sampling and testing plus a lengthy aging and curing process produces dark, rich compost.
