

# Pellet Mulch

with **Tack & Biostimulant**

## ***Pelletized Seed Starter***

*Diamond Star is a pellet mulch formulated from recycled wood and cellulose fibers dosed with a biostimulant that improves soil structure and enhances plant nutrition.*

***Delivers biostimulant to jumpstart germination of the seed and promote healthy growth***

***Retains vital moisture in the soil for fast establishment***

***Protective Mulch Cover stays in place & holds color through germination***

***Better Performance, More Professional than straw***

### **COMPOSITION**

Wood, Cellulose, Tackifier/Surfactant, Biostimulant, Dye Tracer

### **Eco SAFE**

100% Survival 48-hr LC<sub>50</sub> Daphnia Magna method 202 EPA-821-R-02-012
