

24/25

MAST YOUNG PLANTS

WELCOME

Mast Young Plants is pleased to offer you this 2024-2025 Spring Liner Catalog. Our team takes great pride in selecting the highest quality products for you, from longstanding customer favorites to the best new introductions from the industry's top breeders. Buy with confidence, knowing that the varieties in our program meet our high standards for excellence, confirmed through extensive greenhouse and summer performance trialing. You're also supported throughout the process by our industry-leading customer service team.

2025 PROGRAM HIGHLIGHTS

RETAIL-READY PERENNIAL GROUND COVER PROGRAM

After introducing this in 2024, we're adding the 3-06 perennial ground cover program to our catalog in 2025. We start and bulk up these perennials in the summer and then overwinter them at near-freezing temperatures. They wake up as the spring temperatures climb and we ship them to you with your last liner orders of the spring. Handle and variety tags included with each 6-pack, you receive them ready to set directly on your retail benches. See pages 132-133 for full program information.

NEW TROPICAL HIBISCUS LINE

After the genetics from our 2024 hibiscus line moved into the Proven Winner program, we searched for the highest quality hibiscus to replace it with. We're pleased to introduce a very reputable line of tropical hibiscus from Aris, the Tradewinds® Series, for our 2025 program. Look for these on page 54 and also in our summer trial garden.

FOLIAGE PROGRAM

Delight and attract customers with increased interest in foliage plants and houseplants with our expanded foliage offerings. Select your favorites for standalone foliage programs and to create an exciting tropical look in annual combo containers. See pages 128-129 for our expanded foliage program offerings.

SUCCULENT MIXED TRAYS

We're refreshing this popular program with some exciting updates in 2025. If you're looking for an easy bench display solution, our 32 cell Chick Charmlettes line features easy and attractive retail ready trays. We're also adding two new succulents with limited availability, into some of your favorite mixed trays for an exciting new look. Check out these improved mixes on pages 141-143.

We're rooting for your success and look forward to helping you grow your business in 2025!

BOOK YOUR ORDER EARLY!

Receiving your MYP catalog in July gives you time to plan your season and book your orders. This booking cycle begins at the end of July for orders shipping weeks 40-20. Give your growing season a successful start by booking your order early and taking advantage of these benefits:

EARLY ORDER DISCOUNT (EOD)

Early Order Discount (EOD): An early order discount (EOD) lowers the cost of your plants and applies to all orders booked by October 31, 2024. We recommend placing as much of your initial order as early as you can. You can always add a product later if you make additions or changes to your program but ordering early ensures that the bulk of your order is confirmed with the EOD pricing.

SELECTION AND AVAILABILITY

Good availability earlier in the season means it's more likely you'll get your entire order confirmed. Our trays are grown to order, and we book orders with the cutting suppliers after receiving orders from your broker. Suppliers have a limited number of cuttings, and once they are gone, we cannot get more.

ORDER PROTECTION

Order Protection: Booking early helps to protect your order from unexpected shortages arising during production.

DEER RESISTANT

Research demonstrates these varieties to be less desirable to deer.

SEASON EXTENDERS

We grow every plant in our trial gardens all summer long, so we're confident these plants perform best in summer's heat.

MYP BEST SELLER

These varieties are top sellers and ones that you can feel confident will do well for you too!

NEW

These plants performed so well in our trials that we're offering them to you in our catalog this year!

MAST YOUNG PLANTS EXCLUSIVE

Through our relationships with our top breeders, we secure the rights to sell new varieties to our customers, one year before it becomes available to all other rooting stations. Book with MYP and be the first to try these out in '24!

SMALL POTS

These varieties can be grown pot tight on the bench for high density production.

MOUNDING HANGING BASKETS

These varieties grow more upright producing baskets which do not require sleeving.

TRAILING HANGING BASKETS

These varieties will spill down over the edge of the pot. Ideal for large premium baskets.

VINES

Climbers, fillers, and trailers! These varieties are great for trellises, baskets, or deco pots!

OUR LIVING CATALOG

What's better than this catalog full of pictures of beautiful plants? A living catalog you see, smell, and touch by browsing through aisles and acres of beautiful plants! We call our summer trial garden a "living catalog" because it is where we field trial the varieties that we offer in our program. This allows us to see plants' performance in actual garden conditions, compare genetics across varieties, evaluate new introductions, and appraise the performance of novel combinations.

Our trial garden gives you confidence in your selections. Rather than choosing varieties for our program from breeder photo galleries, we carefully select from the varieties that meet our high standard for quality and which we are confident we can grow well for you.

The summer trial garden is open to the public from weekdays 8:00-4:30 and is fully staffed during the Michigan Garden Plant Tour, happening from July 29 - August 9, 2024. Make plans to visit us this summer!

3525 Bristol Avenue NW
Grand Rapids, Michigan 49544

Monday through Friday
Weekdays 8am - 4:30pm
Mid-July through mid-September

OUR 2024 TRIAL GARDEN WILL FEATURE:

- 500 unique and custom designed combinations in hanging baskets, deco planters, and window boxes
- 140+ new varieties from top industry breeders displayed in sun and shade beds and containers
- AAS trial garden
- 2024 'Plants Per Pot' trial. You asked and we listened! We will be growing out some of our favorite varieties in our standard containers using different numbers of plants per pot. Use this trial to help decide the ideal number of plants-per-pot for your greenhouse.
- 2024 'Cultural Fertilization' trial. You asked about the feed we apply to the pots in the garden, and we'll be growing some of our top varieties with clear water, standard feed, and some slow-release rates.
- 2024 'Foliage in Full Sun' trial. We are growing out tropical varieties in full sun to see how they perform.
- Shaded seating with wireless internet available.
- Our customer appreciation day will be held on Thursday August 15, 2024. Make plans to join us for garden tours, dinner, games with prizes, and more! Reservations for this event are preferred and can be made at customer care@mastyoungplants.com or by calling 1-800-541-3910.

We invite you to follow along with updates on our website and on Facebook, Instagram, and LinkedIn. Our 2024 trial garden report will be published to our website in October. Check back there to see which of the **new for 2025** varieties really stood out this summer!

Master Box
on a
pallet
jack

Master Boxes are 48" long by 48" wide and can be anywhere from 21" tall (single stack box) to 48" tall (double stack box) to 70" tall (triple stack box). The weight is anywhere from 150 lbs up to 467 lbs based on the size of the order.

Master boxes are delivered by XPO or FedEx Freight services. In most cases a loading dock, forklift or skid steer is required to be able to off load the Master Box from the semi-trailer.

Any orders that exceed 3 Standard Boxes, MYP will automatically ship in the Master Box unless otherwise specified by the recipient. Freight is billed per tray.

TRAYS+TRUCKS

LINER TRAY SIZES

**SPLIT
51**

**Grown as 51
Sold as 50
(25mm)**

Our most popular tray size, you will find the most varieties available in this size. Vegetative items are in Ellepots and seeded varieties are in loose fill.

5.5"W X 21"L

**34
STRIP**

**Grown as 34
Sold as 33
(25mm)**

All zonal and ivy geraniums are in this tray size, either in Ellepots or Growcoons.

10" Diameter

**QUICK START
10-PACK**

**Grown as 10
Sold as 10
10-pack Tray**

9"W X 21"L

MYP TRUCK

Deliveries that ship via our MYP truck will arrive in a 53' semitruck with a temperature-controlled trailer. Trays will arrive on a wheeled CC cart measuring 22" wide x 53" long x 81" tall. A thermal blanket draped over the entire rack and plants will help keep the plants safe from cold temperatures during offloading. The cart, once offloaded, will be returned to the trailer. Freight is billed per tray. Please refer to our ordering guidelines (page 9) for the MYP truck delivery schedule - based on our shipping zones and the minimum tray requirements.

The CC carts are on a wheeled base so they do not require a forklift to move them. The dimensions are: **22" w X 53" long X 81" h.**

ORDERING + SHIPPING

ORDERING GUIDELINES

MYP Truck Delivery Orders

Order deadline is Wednesday 12:00 PM (noon) EST, prior to ship week.

SAVE TIME AND MONEY

As your trusted supplier of rooted cuttings, Mast Young Plants provides innovative solutions to meet your growing needs.

Some crops have a long grow time requiring greenhouse time to reach maturity. Rather than opening and heating your greenhouses early for these time-intensive crops, order from our Quick Start program and let us propagate them for you in our already warm greenhouses. Quick Start saves you time and money.

After extensive trialing and testing, we are pleased to introduce these Quick Start varieties in 4" 10-pack trays and 10" white hanging baskets:

SERIES/VARIETY	4" 10 PACK TRAY	10" HANGING BASKET

BETTER COMBOS

INTRODUCING THE “QUICK BLOCK”

- Innovative product line from MYP allows growers to turn combos even faster!
- Features a mix of genetics that have been trialed and proven to grow well and finish beautiful combos
- Introduced in 2019 and growing in popularity every year since

QUICK BLOCK SPECS

- Each Quick Block contains a mix of 3 25mm liners that are 4-5 weeks old.
- The Quick Block mixes are trusted breeder mixes plus our exclusive Blueberry Scramble Mix combines Petunia Shortcake Blueberry and Dekko Banana with the accent plant Alternanthera Little Ruby for a unique look.
- Quick Blocks are made of compressed coco fiber that absorb water and increase in size when first watered. An attractive clear plastic holding tray helps with ease of handling. Each block will contain a variety label growers can use in their combination for accurate tagging.
- Liners are planted into the Quick Block and grown for 4 weeks, at which time they get another pinch and an application of B9/Florel for further branching. These steps ensure that Quick Blocks arrive at the grower ready for planting and a quick finish after transplant.

FINISH TIMES

- 10” container – 1 Quick Block for 4 weeks.
- 12” container – 1 Quick Block for 5 weeks or 2 Quick Blocks for 4 weeks.
- 14” container – 2 Quick Blocks for 4-5 weeks.
- Don’t forget! You can also purchase Quick Blocks and sell them the week they come in as a “prefinished” combo customers can place in containers they already have at home.

ORDERING AND SHIPPING INFORMATION

- Minimum order is 6 Quick Blocks: 6 Quick Blocks = 1 shipping unit.
- Our half box holds a total of 12 Quick Blocks.

TRANSPLANTING RECOMMENDATIONS

These recommendations are based on our grow out trials we did in the greenhouse under early spring conditions.

10" HB	1 quick block per basket for 4 weeks at 68°F average
12" HB	1 quick block per basket for 5 weeks at 68°F average
12" HB	2 quick blocks per basket for 4 weeks at 68°F average
14" HB or pot	2 quick blocks per container for 5 weeks at 68°F average

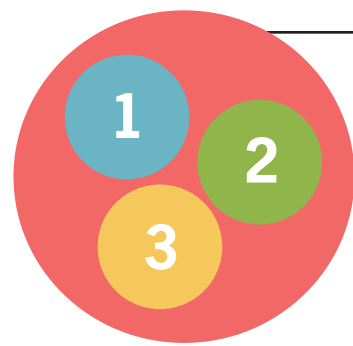

COMBO PLUG RECOMMENDATIONS

Through our trialing process, here are some suggested guidelines for Trixi®, Kwik Kombos™, Confetti Garden™, and Durabella® Combos:

12" HB	3 plugs per pot takes 8 weeks at 68°F average
12" HB	4 plugs per pot takes 7 weeks at 68°F average
10" HB	1 plug per pot takes 9 weeks at 68°F average
10" HB	2 plugs per pot (close together in the center) takes 8 weeks at 68°F average
10" HB	3 plugs per pot takes 7 weeks at 68°F average

Available beginning week 2

Collection

Pennisetum advena Fireworks
upright, 24–36"

Pennisetum setaceum Rubrum
upright, 24–36"

3-06 GROUND COVER PROGRAM

New!

GROUND COVER

New to the MYP Catalog for '25 is our perennial groundcover program for retail garden centers and landscapers. As MYP works to be your one stop shop for all your growing and garden center needs, this new product line makes it easy to get these reliable overwintered perennials that are ready for early spring planting or retail benches.

Planted in the late summer and fall before, these hardy perennials are bulked while the weather is nice and then put to sleep in near freezing cold frames for the winter. As spring warms up and the earth comes back to life, these groundcovers wake up in their protected cold frame they are grown in. Trays are shipped to customers in the early spring season when growers are getting ready to open their retail outlets. Put these trays on the bench and give customers a choice of tried and true proven varieties to plant in their home landscapes.

Each tray is provided with tags and handles:
