2024–2025

# PSI PAST, PRESENT, FUTURE...

Each year is an attempt to figure out the future choices to be made by consumers of our plant products and which items the growers want to grow and offer. This challenge is a constant conflagration between optimism for new items and reality of how new items are accepted by growers, generally at a more deliberative pace. It is the constant tension of production versus sales/marketing. We can look to the past to adjust our production numbers to meet expected future demand, but how does this determine the choices now regarding new items?

The 2024/25 season brings along a large group of new Calibrachoa offerings from Westhoff – as in 21 new offerings with a few renamed to fit in the Caliloco series. These are exciting new colors and styles that will broaden the PSI and Westhoff Calibrachoa offerings. PSI continues to build on the relationship with Plant Haven International with the introduction of some additional breeding from Penhow, the breeder of the Nemesia Escentials, by adding a number of Diascias. These are of two types: Little Dragon is the more traditional spreading/trailing type with tremendous number of bright flowers and the Towers of Flowers are more upright with large flowers. Other additions include a new Cosmos Cherry Chocolate, a few new herbs with Thyme Summerdreams Orange, Rose, Spicy from Volmary, Lobularia Compact series from Danziger and Lobularia Lucia series from Volmary, Salvia Tanami series from Westhoff and then there are plenty of additions to existing series already produced by PSI. Some big changes, as you may have noticed on the catalog cover, is the change of the Portulaca from Colorblast to SeaGlass. Some are new varieties within that series but most are the same with just a name change. Similarly, the scientific botanists/geneticists have continued to “review” the genus names we have used for many years and have encouraged us to update our listings by moving Setcreasea and Rhoeo into the Tradescantia genus. You will see that change reflected in this season’s program.

By looking at past, present, and future, PSI has concluded that the Petunia URC produced has not been to the expected consistent standard demanded by our customers. So, for the 2024/25 season, the Petunia offerings have been significantly reduced as the production farm in Mexico works to implement a program that will deliver consistent quality URC with no or few flower buds. As great as all the new breeding programs are, the petunias are bred to be more day-neutral which is great for selling at retail but challenging to produce a quality URC when all the plant wishes to do is produce flowers. We apologize for the reduction in Petunia offerings for the coming season but want our future programs to be better and sometimes that means reductions in the present program.

As always, thankful for everyone’s support and wish all a great season ahead.

# GERANIUMS

ARISTO® Bright Red  
Regal Geranium

# SCENTED COLLECTION

Plant Source International is the undisputed leader for the production of scented geranium unrooted cuttings. Grown primarily for their distinctively scented foliage, our collection also has varieties with highly ornamental features, such as Lady Plymouth with the variegated foliage and Lemona that has a brightly citrus scent paired with the heaviest flowering scented geranium available.

# PINKERBELL

## *Regal Geranium*

Pinkerbell is a stunning regal hybrid with a more compact habit than other lines, but full of flowers that come early and bloom non-stop throughout the summer months. Consumers will discover that Pinkerbell is a hummingbird favorite!

CANDY FLOWERS® Violet  
Regal Geranium

ANGELEYES® Blueberry  
Regal Geranium

# ARISTO®

## Regal Geranium

The Aristo series of regal geraniums has been selected for their ease of rooting and the uniformity of blooms across the colors. The habit allows this series to be utilized in pot sizes from quarts to 8 inch. Aristo varieties will continue to flower throughout the summer.

# COTTAGE™

## BRACTEANTHA

Eager to reinvent the category of strawflowers, Westhoff offers the vastly superior Cottage series of bracteantha. Combining the most disease-resistant genetics available with all-season durability, these plants mean success for the gardener. The colors are matched perfectly in production and can easily be mixed in larger containers for 4-in-1 color combinations for spring through autumn sales.

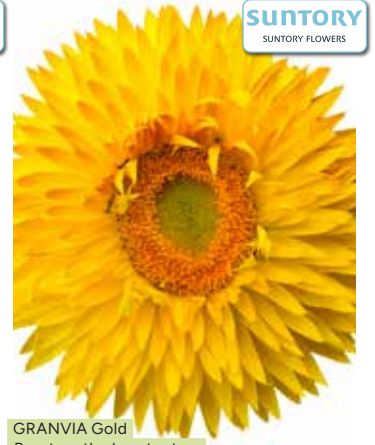

# GRANVIA BRACTEANTHA

# BABY BUZZ®

## BUDDLEJA

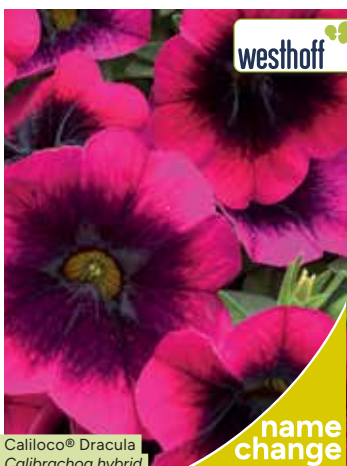

Baby Buzz® Buddleja provide growers with the industry's first series of trailing Buddleja for hanging baskets or container plantings. Create natural butterfly feeders with cascades of vivid, sugar-packed pink blooms that flower continuously for months at a time.

# CALILOCO®

## CALIBRACHOA

Westhoff continues their reputation of bringing unique flower colors and patterns to the market. The legacy continues with the Caliloco® series of Calibrachoa. With new colors and patterns, the Caliloco® series offers a wide selection of new and novel selections, as well as a new home for some classic standalone varieties.

# CALITASTIC<sup>®</sup>

## CALIBRACHOA

Incredibly uniform in habit and flower timing, these calibrachoa set the bar for grower expectation. Very early to flower, all varieties flower at 11 hours critical daylength and stay open and in flower under low light conditions. This daylength neutral series is a great line for retailing from early spring and continuing throughout the season.

# UNDER THE SEA COLEUS

Under the Sea coleus plants hail from Canada, where students bred them at Saskatchewan University. So, what sets this collection apart from all other coleus varieties? The “wild shapes and colors” found in the various cultivars make them so alluring. Well, that and the fact that they are not your typical shade lover as most coleus are – these can tolerate sun too!

# LITTLE DRAGON DIASCIA

Diascia Little Dragon collection is the result of Penhow breeding, which has created a prolific array of uniform flowers in a variety of colors. Little Dragon has a tight, compact rounded habit, and heavily blooms in spring.

Diascia Towers of Flowers has a unique erect habit, with strong branching triangular flower spikes. This series has a prolific array of uniform large flowers.

Both the Little Dragon and Towers of flowers are long-flowering and can be grown in garden borders, rockeries, containers and baskets.

# LOTTY DOTTY

## HYPOESTES

The Lotty Dotty series of Hypoestes brings a burst of color to mixes and small foliage programs everywhere. With good vigor, branching and large leaves, Lotty Dotty varieties are robust enough to compete in mixes, and bold enough to stand out. We recommend growing your young plants under lights during the short days of late fall and winter to prevent flowering.

# NEMESIA

## ESSENTIAL™

Essential is the next generation in Nemesia breeding. Early flowering, heavily scented, beautiful managed habit and improved heat tolerance makes this series take a big leap forward for the genus. New bright colors and unique bicolored flowers also set this series apart. This series of Nemesia is an “Essential” part of your program.

Spring Plants

# GELATO™

## OSTEOSPERMUM

The Gelato series of Osteospermum combine heat tolerance, easy flowering, and a compact tidy habit with the colors customers are looking for the most!

# SEAGLASS PORTULACA

SeaGlass portulaca (formerly ColorBlast) brings bright, vibrant colors to the summer landscape like no other. Bold solid colors and shimmering bicolor varieties radiate color all summer long. Perfect in hanging baskets, window boxes or as a groundcover. The SeaGlass series has a wide range of colors and is impressively heat and drought tolerant, making it perfect for those hot spots in the landscape. Don't forget to check out the amazing double flower varieties.

Spring Plants

# THUNBERGIA

Sunny Susy® varieties are easier to handle than most unruly types in this class. These well-branched and fuller selections have an increased shelf life and sales window for growers and retailers. They are easy to recommend to customers for quickly covering patio lattices and fences, and are excellent climbing components for combinations paired with other vigorous varieties. We also love the suitability of Sunny Susy® varieties in hanging baskets as both a spiller as well as climbing up the hanger for added interest.

Spring Plants

# ESTRELLA™

## VERBENA

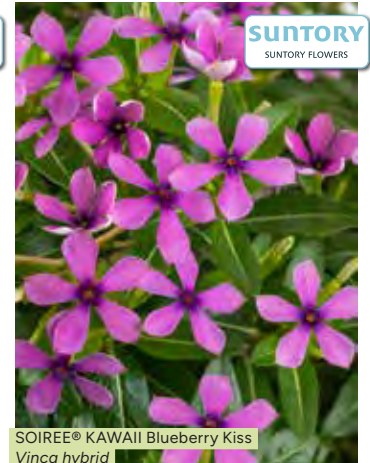

The Estrella™ series starts with an upright habit, which makes for an excellent retail presentation. As the plants grow, they become more semi-trailing, beautifully filling out gardens and hanging baskets.

# VINCA

Soiree® is an exciting collection of heat-loving plants that retain a beautiful shape while providing outstanding coverage in containers and landscapes. Perfect carefree color all summer! **Soiree® Flamenco** aren't like any other vinca. They put on a fashion show in your beds, baskets and containers with fringed, ruffled petals and striking bi-colors. Perfect for summer, they are happy in warm conditions. **Soiree® Kawaii** will light up any garden with their amazing flower coverage, vivid eye-drawing colors with deep glossy green foliage. These plants keep their habit all summer long, with no leggy branches and tons of flower power.

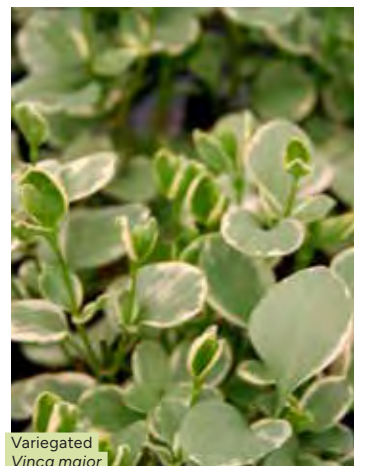

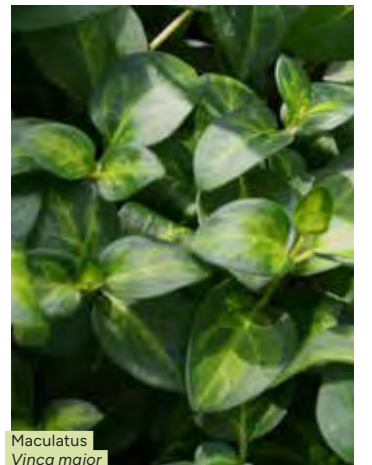

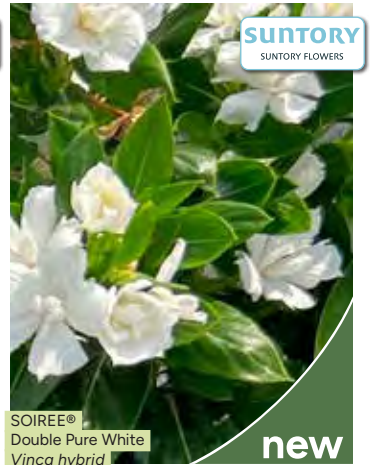

Spring Plants

# SORIEE® DOUBLE SERIES

## VINCA

Suntory offers an improved double series with elegant flowers in a tighter, more compact growth habit. This series has excellent heat tolerance and a continuous bloom time – mid-spring to fall. A great series addition to other Suntory Vinca – Flamenco and Kawaii.

# CULTURE

At PSI, we are users of our own unrooted cuttings for finished production and understand how important it is to have accurate information. At any time, feel free to contact our team for additional information, because our business is invested in the success of yours.

# Rooted Cuttings

THE FOLLOWING GROWERS ARE PRODUCING ROOTED CUTTINGS OF PSI MATERIALS:

## United States:

Al's Garden Center and Greenhouses (OR)  
Beds & Borders (NY)  
Davis Floral (GA)  
DGI Propagators (MI)  
D.S. Cole (NH)  
Dupont Nursery Inc. (LA)  
Esbenshade Greenhouses (PA)  
Galema Greenhouse (IN)  
Gro-N-Sell (PA)  
Kube Pak Corp. (NJ)  
Lucas Greenhouse (NJ)  
Malmborg's Greenhouses (MN)  
Mast Young Plants (MI)  
PlantPeddler (IA)  
Sunbelt (GA)  
Weber Greenhouses (IN)  
Welby Garden Co. (CO)  
Wenke Greenhouses (MI)

## Canada:

Bradford Greenhouses  
Colonial Florists Ltd.  
Ed Sobkowich Greenhouses Ltd.  
George Sant & Son Greenhouses  
Greenfield Gardens  
Schenck Farms & Greenhouses

# How to Order

## Cutting Availability

URCs will be available weeks 30-20. For a complete listing of varieties and current availability, check the PSI website: [www.plantsourceintl.com](http://www.plantsourceintl.com).

## Royalty

All varieties denoted with a company logo or noted as protected are patented varieties, registered for plant protection or have a breeder's fee. Propagation is strictly prohibited on these varieties.

## Claims

To receive consideration, claims must be reported to PSI within seven days of receiving cuttings.

## Minimums

The minimum order is 2000 cuttings. Minimum per variety: 100; shipped in multiples of 100.

## Shipping

All orders are custom cleared in Atlanta, Miami, Toronto or Vancouver. Once cleared, shipments are delivered overnight by FedEx. Freight is included in the cutting cost.

For Canadian shipments: Phytosanitary fee may be added to the invoice. Government Agency Fees are the responsibility of the recipient.

## Tags

Tags for URCs can be ordered in increments of 100 per variety for everything PSI offers. Tags are required for patented varieties, but are not automatically shipped with your order. Tags for Terra Nova products are required and will be shipped to the customer.

## PSI Warranty

PSI warrants to the extent of the purchase price that all cuttings are sold true to name and shall conform within recognized tolerances. No further warranty is expressed or implied as to future marketability. Purchaser shall be limited to the invoice value at the time of purchase of any product as its exclusive remedy to breach of warranty.
